

# How to upgrade Infinix smart device Via X Flash Tool

## Requirements:

1. Driver\_Auto\_Installer\_EXE\_v5.1453.03
2. The Stock Rom

Caution: if you win 8 or win 10, first you need disable driver signature compulsory

before you install the Driver (check the PDF→

 How to disable driver signature compuls... )

## Step

1. Install the driver

 Driver\_Auto\_Installer\_EXE\_v5.1453.03

Then choose the suitable driver for your laptop, and install it

-  WIN\_8
-  WIN7\_WINXP
-  ReleaseNote\_Driver\_Auto\_Installer\_v5.1453.03

Caution: First disable Antivirus is very important, because sometimes the antivirus will recognise the driver as a virus.

2. After install the driver, restart your computer.
3. Open the rom file (we do x551 as a example)

### 3.1 Unzip the files

 XFlashTool-X551-A1-L-20151023

### 3.2 Click the XFlashTool-X552-A1-L-20151023

-  flashtool
-  X551-G808-A1-L-20151023
-  XFlashTool-X551-A1-L-20151023

### 3.3 Running the XFlashTool

3.4 power off your device,connect to the laptop with USB cable, the device will start wo upgrade automatically.

**Caution : Don't move the device during the upgrade**
